Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1, 4-9 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 1 was amended to include a the chemical formula $\text{Ca}_x\text{Mg}_y\text{SiO}_z$. Specifically, the amendment also including amending the chemical forumula by changing the letter following the "O" from "x" to "z". This is deemed to be new matter. As noted, in both the original specification, page 5, line 8 and the original claim 3, the letter "z" was never present. Also, the description of "z" as being the value to balance the oxidation state of the compound is not sufficient to support it being placed after the "O" in the formula. Equally, "z" could have been placed after either "Ca" or "Mg" in the formula and be defined as "the value to balance the oxidation state of the compound." The placement of "z" at any place in the formula will be deemed new matter.

Art Unit: 1731

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1, 4-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 appears to be a vague listing of various elements in forming a glass batch.

Moreover, claim 1 refers to "other glass components" which is deemed indefinite.

Claims 5 and 6 refer to "said second glass batch" and "said comparative composition" which lack antecedent basis.

Response to Arguments

5. Applicant's arguments with respect to claims 1, 4-9 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 1731

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
